It is worthy of more than a passing notice, that in the South all true and loyal
men are friends and supporters of the Administration. None of them desire its
overthrow. It is their shield. Support of
it they make a test of loyalty. Its Northern enemies can find no Southern allies
save traitors. Should they succeed in
overthrowing it, all that is left of Southern loyalty would be crushed out. The
Union men look upon it as their rallying
point, and upon its enemies as their enemica. Such is the distinguishing line between parties in the South, and such it will
continue to be till treason be cast down
and trodden under foot. Hence, while the
war lasts, a party hostile to the Administration must, directly, or indirectly, aid the
rebellion. Of course the party in power
is a war party; for the Government is
fighting for the honor and existence of the
Republic, and must, if we would preserve
it, be administered now and hereafter by
those who hold that the war was caused
by the slave power. by the slave power.

THE PACIFIC RAILWAY.

The importance of the passage of this great national measure by Congress cannot be overestimated. When completed it will place the commerce of the world within the grasp of the American Union, and beater a rell secure the post of the conbesides it will secure the unity of the gov ow, will spare no pains, and learer or trick untried, by which they munity of interest and feeling for all commay hope to cheat or mislead the votes of the soldiers. Men are not such fools by the thousands, as to vote for a cause that they are fighting against. They do not usually, in large boiles, whatever stupid individuals, may do, sustain with their suffrages, and give power and place to the men who pronounce the war in which they are fighting an unholy war, and who denounce them as birelings or murderers for taking up arms against traitors and rebels. Neither do the officers and men who are in the army find if destrable that the sympathisers with secession who are in the army find if destrable that the sympathisers with secession who stay at home about take advantage of their absence, to you the member of the manner of the "impoverished masses" we protest against this species of Democratic conversal economy and reform. te themselves and their traitor comrades of all the good offices, and leave the pat-

There is indeed no good reason to suppose the army will gote for the abominable constitution rejected with such utter loathing by the people; but smap and controlling reasons why they will vote against it. All this cry that the army will vote for the atroclous instrument, is only an attempt of the section gang in this State to prepare the public mind for some great fraud. But even that cannot be accessful here. We will have neither treason, nor rebellion nor sections fastened upon Illinois in any way, or by any means. The attempt, however akillfully managed, will be a failure. The people of this State will not tolerate such an effort. And the traitor politicians and Golden Knights who are engaged in the informal work, will only be permitted to go for enough to prove their complicity with treaton and crime, and reap the predictions in the informal work, will only be permitted to go for mough to prove their complicity with treaton and crime, and reap the predictions in the informal work, will only be permitted to go for mough to prove their complicity with treaton and crime, and reap the predictions in the informal work, will only be permitted to go for mough to prove their complicity with treaton and crime, and reap the predictions in the informal work, will only be permitted to go for mough to prove their complicity with treaton and crime, and reap the predictions in the informal work, will only be permitted to go for the benefit of alayery, Maton is dead, Bushamai living in retirement with the knowledge that no loyal man in the Nation section, and thouse issued the which is to be restored to power. Slavery does not have the Union one whit less than if they were, as it knows they ought to be, its deadly enemies. It misinterprets as weakness the deference

we still pay to a compact which the other party has utterly and vengefully repudiated. Howell Cobb, the bullying rebel brigadier, said to one of our officers in a recent flag-of-truce interviews, that previous to the order of Gen. Butler in regard to the New Or-Lace women, the gulf between the North and South was not unfathomable; but that order had made the gulf "deeper than hell, and b eader than eternity!" He said he had just read it to his troops under his command, and that it had touched "the most secret springs on the one hand, and revenge on the other and that new there could be no Union." There will be a Union, Howell Cobb-your nork

The New Orleans papers state that the rope used on the occasion of the execution of Munford at New Orisans, was taken from the parish prison, and was intended for one of Gen. Butler's agents, who was captured early in April and confined in that place. He was in April and confined in that pure, he was to have been hung with that rope the same day that the fleet passed the foris, but the event caused a postponement, which saved the life of the agent.

Preparations are in progress in Detroit for the establishment of a new Democratic paper. It is to be under the editorship of John B. Harmon, and will be even more trea-sonable than the Free Prass. The party don't doubt the treasonable instincts of the Press, but while it is treasonable it is also treacher.

Law It is a fact that should not be over-looked that the very men who are now most classorous about "the Constitution as it is," clansorous about "the Constitution as it is," and who profess to regard it as a holy thing, are those who were most rampant, eighteen months ego, for patching the secred instrument with multitudinous amendments of a a pro-sistery character. The secusion Times editor was one of the most bistant advocates of amendments.

REMONED.—The Galesburg Pee Demonst learns that Hon. W. S. Gale has resigned his office of Commissioner to take the soldiers' vote on the new constitution, and that Bill Hacker, seems, will appoint a substitute. We presume that Mr. Gale concluded, after the people of the State had pronounced so-emphatically against the swindle to submit to the popular will, and not play into the heads of the secessionists any further.

The Febreral Position and PROSPECTS.

The federal camp is within range of the gunborts fire, which are in Stone River, and is deemed a safe position. Entrenchments have, knower, been thrown up; and rainforcements are awaited. General Brasma's troops—1,000 men.—from Rey West, have arrived at James Island. Before operations can be safely resumed the federal force must receive rey large defitions, owing to the fact that the rebel entrenchments are surrounded by marshes, and the only approach, over a ridge of dry ground, is commanded by their guns and protected by the very large force largues and protected by the very large force shall arriving, and their proparations for the definee of Charleston, which would be expasted to boughstdment if the rebels were driven off dames Island, are upon a very extensive scale. There is, however, some difficility in obtaining troops, from the fact that the rebel came is nowhere considered as a sanugh to similer detaching any part of their forces, and the authorities in Relimond are calling in all available troops for the defense of the capital.

Gen Benham and staff are the among the passengers by the Ericason. We understand that the general has been despired of his command, and sent home—not under formal arreat, but with orders to report to Washington, and that a trie by court martial will be hold. Gen. Huster, we have been informed, believes the disaster before Charleston was owing to been management; and, though the expedition to James Blaind was undertaken with his consent, the subsequent movements were ordered by Gen. Benham, who was in command of the expedition. The result is sueb, in his estimation, as to warrant the step he has undertaken. The arrival of reinforcements for General Huster's army is amounted in the following letter from our Beauton correspondent:

dwellings and chased those fair, frestin and ferocious rebels to their bedrooms to have selsed them. How many riots, think you, would have been induced by foreing acreeching women through the streets to the guard-houre? If there had been any manhood in a New Orieans mob, it would have fait itself called upon to have fought then or never.

"What was done? An order, charactering the set of such women in pisia Eoglish, was made, which at once executed itself." "How do you "regard and trest? a lend woman and her remarks, as she passes you in the street? Pass her by do you not? You are not bound to notice her acts or remarks. But some of the New York journals seemed to think the Union soldiers and oillicers were bound to rebuff and ricort upon women whose eats were as public—to paricy with them—and, therefore, take offence at the order. Rightly, if that construction were the correct one. But after that order every man in the Union forces—officer or soldier—was bound in honor not to notice say of the acts of those women. They were no longer insulis; they became the bishchaiments of which Solouns spenks in the Proverbs. What has been the result? Since that order no man or woman has insulted a relief or officer in the Union forces in New Orleans. And from the first hour of their landing, no woman has compilained of the conduct of these soldiers towards her, nor has there been a single cause of compilain. "A woman can now walk shode from Chairesum? When Mass Perry being thus possed, she sharply whised over, and shricked over the horrible wicked Doctor—but the Doctor, severtheless, would peel, and did peel off the on are aloth grammed on skin—to the horror of D. Ferkhes, and to the amazement of the astounded "faculty." But Dr. Sayre, the ruthless, roguish, rascaily Dr. Sayre, the nuthless, roguish, rascaily Dr. Sayre, did not, would not stop here. He added largely to the numerous pieces of charcoal and pebible stones, Dr. Perkins had already taken from the maiden the trophies and treasures of the four years. merous pieces of charcoal and pebble stones.

De Perkins is all arready taken from the maiden the trophics and treasures of the four years studying same, and, what is more, with an instrument well known to the faculty, he demonstrated, that Miss Perry lived, moved, acted, performed, just as the "rest of muskind." Dr. Perkins ranted and reared; the faculty, the grave faculty lenghed—Miss Perry whited and prayed, and the Wall street broker's vision of an El Dorado dissolved. Acress oneses—and Miss Perry laft her patital Fourth street quarters to go to Bellevue—to be in hospital there, among the so-called poor of the city, where Dr. Sayre has her under his eye, feeding her on mush, peas, and other expanding esculents; and he has not a doubt, that with a little helping modicine, to a day or two, the fourteen years theory of Heling only by eating and drinking will all aspide.

There never has been so great an imposition attempted in this city—and the only mistake of Dr. Perkins was in calling in the New York faculty, and not applying directly to Baronum. Mrs. Cunningham's "begus tooy" performance was thought to have immortalized our New York city, but the Oneida charcoal skin, got ng in the rural districts, heats in Motropolitians out and out.

History will record that the only friends of the Union found by this army in Eastern Virginis are negro laves. So are they the guly true friends we have found elsewhere in Sc. casia. But a fittle while ago a slave warned us that Col. Job. Stant was moving swittly to our rear with a strong force of cavalry, Our own cavalry did not move in fine to interest the expedition. The experience of the various reconnoissance departments of our armies in the field is uniform. The information derived by them from tepld Union citizens and deserters is always vague and masticiactory, often treacherous. A largo seldom deceives. He imparts his information to the best of his ability. Many strive to acquire information by which they hope to recommend themselves upon resching our lines. Please observe—and I speak, upon festilians of officers serving in this ographical department—that the military maps of his field have been corrected upon information of the field have been corrected upon information derived from contrabands.—They have correctly described localities and roule which were inaccessfule to recommissance officers, and in every instance where it has been possible to compare the intelligence derived from them with the country, they have proved realistic. A gestleman connected with the topographical department, assured me distincily, that their best maps were dashed upon information communicated by negroes. But this testingony is uniform throughout rebeldom. Nose but relean politicians or stupid officers, prefered to dispute it. Unhappily the army it full of both classes, of high rank. It is humiliating to reflect upon both the stundity and hostileasses of officers who might the The Union Dog.

TATING TO SMOOTH THINGS OVER.—A deputation of the Council headed by some of the "fire in-therear" Democrats and the editors of the secession organ, visited 'Change yesterday' to try and paten up differences with the Board of Trade and induce them to go in for the Fourth of July celebration. Undoubtedly they would have succeeded had not the editors of the S. O. constituted a part of the deligration. tors of the S. O. constituted a part of the de-caption. As long as they were present the Board would listen to 'no overtures, and the thing fell through. The Board can stand any-thing better than a secession sheet urging a Fourth of July celebration.

Reeting of the Ladies' Education The third annual meeting of the Ladies' Education Society was held at the First Baptist Church on Sunday evening last. After introductory services the report of the Board was read. This paper—after referring to the hin-drances which the Society had necessarily en-countered in its work, in such times as these, and to the Divine favor, which had notwith-standing secured to it a gratifying measure of success—went on to discuss in detail the opsuccess—went on to discuss in detail the operations of the year. The receipts, with a small balance in the treasury from last year, smount to \$508.65; the expenditures to \$606.85; leaving a balance of \$105.90. A handsome acknowledgement was made for the service rendered in the course of loctures far the Society's benefit, delivered in the winter by Des. Everts Boyst, Hamphrey, and Dixon; Professors Fisk and Mixer, and J. W. Shehan, Eaq.; also for a series of articles on Ministerial Education by Rev. J. A. Smith, D.D., published recently in the Christian Times, and written by request of the Beard. During the year, twelve young men have been aided by the Society. Of these, two, when the first call for volunteers was made, emissed in the service of the country, and smother has since

After the reading of the report, a sermon was delivered by Rev. Dr. Boyd, characterized by the speaker's wouted vigor and metion. The text was the familiar words: "He that gooth forth and weepeth, bearing precious seed," etc., the aim of the sermon being to show the nature of all evangetical work, and the encouragements to faithfulness in its procedurion. THE RIVER.

A communication was read from the Board of Public Works with reference to the condition of the river. The Board was satisfied that most of the inconvenience complained of by citizens was due to the North Branch—and that if this were removed no evil would occur from the presence of the water in. the South Branch. It was proposed to clean out the North Branch by erecting a dam and water-wheel, there to finab out the river at an estimated expense of \$25,000. The cost of a can'd from the lake to the ziver would be \$120,000. Although the cutting of such canal might be the best remedy, yet in the present state of the city finances, they fild not feel justified in recommending it. Ordered filed and published.
